CERTIFIED MAIL

Roberta Hirt (6SF-AO)
U. S. Environmental Protection Agency
Region VI
1445 Ross Ave., Suite 1200
Dallas, Texas 75202-2733

Dear Ms. Hirt:

Enclosed is the Site Inspection report (including three "short" copies) and the only copy of the PREscore packet for the Ohio Oil Company Site (OK0001981349) located in Creek County, Oklahoma.

The Ohio Oil Company Site is a former refinery that encompasses approximately 101 acres. The site is located in a rural area approximately 1.2 miles northeast of City Hall of the City of Bristow, Oklahoma. As it was outlined in the Sample and Analysis Plan, the site consists of an area that contains barren spots, old refinery foundations, areas that appear dark and oily, and stressed vegetation. The sampling strategy was directed to identify hazardous substances at the site, investigate whether these substances have been released into the environment, and determine whether these substances have the potential to impact human health and the environment.

Considering the analytical data of this investigation, it is concluded that hazardous substances currently present on-site are attributable to the former activities at the facility.

131032

It is recommended that further investigation is needed at the site under CERCLA.

If you have any questions regarding this report, please contact me at (405) 702-5115.

Sincerely,

A handwritten signature in black ink, appearing to read "Karen Khalafian", with a long horizontal flourish extending to the right.

Karen Khalafian
